RESEARCH PROFILE

I am a postdoctoral researcher at the School of Electrical Engineering, Aalto University, where I am carrying out research in computational statistics under the supervision of Dr. Dominik Baumann, Dr. Simo Särkkä, and Prof. Aki Vehtari. Before starting this position, I was a postdoctoral researcher at IMT Nord Europe and a visiting researcher at the University of Edinburgh, where I was mainly working with Prof. Víctor Elvira. I hold a Ph.D. in Statistical Signal Processing from Universidad Carlos III of Madrid in 2022, under the supervision of Prof. Joaquín Míguez. My research has been published in two journals of different disciplines and four well-known peer-reviewed signal-processing conferences. I have presented all my research advances at eleven international and two national (Spanish) conferences.

My research interests are focused on signal processing, data assimilation and computational statistics. More specifically, I am interested in Bayesian inference in state-space models. I work on providing new techniques that run recursively (online) with reduced computational complexity (compared to the state-of-the-art methods) in order to obtain both parameter and state estimates. I'm also interested in applying these probabilistic methods in different fields of science such as ecology, energy, geoscience and health.

PROFESSIONAL EXPERIENCE

Postdoctoral Researcher School of Electrical Engineering, Aalto University (Espoo, Finland)	Feb. 2024 - Present
Research visit University of Edinburgh (UK)	Jan. 2023 - Jan. 2024
Postdoctoral Researcher CERI Systèmes Numériques, IMT Nord Europe (Villeneuve-d'Ascq, France)	Sept. 2022 - Oct. 2023
Research Assistant Department of Signal Theory & Communications, University Carlos III of Madrid (Madrid, Spain)	Dec. 2016 - May 2022
PhD internship Department of Mathematics and Statistics, University of Reading (Reading, UK)	Apr. 2019 - July 2019
Research collaboration/visit MeteoGalicia (Santiago de Compostela, Spain)	Jan. 2019
Research collaboration/visit Centre Tecnològic de Telecomunicacions de Catalunya (CTTC, in Barcelona, Spain)	July 2018
Trainee Gradiant, Technology Centre of Telecommunications of Galicia (Vigo, Spain)	June 2015 - Aug. 2015
Trainee R Cable y Telecomunicaciones, S.A. (A Coruña, Spain)	June 2014 - Aug. 2014

EDUCATION

Ph.D. in Statistical Signal Processing Universidad Carlos III de Madrid (Spain) <u>Title:</u> Nested filtering methods for Bayesian inference in state space models <u>Supervisor:</u> Joaquín Míguez Arenas <u>Description:</u> Development of Bayesian filtering methods, from a practical en theoretical point of view, in order to perform accurate parameter estimation and prediction of time-varying high-dimensional systems.	Sept. 2017 - Jan. 2022
--	------------------------

Master's Degree in Telecommunications Engineering

Universidad Carlos III de Madrid (Spain)

Sept. 2015 - Sept. 2017

Master's Degree in Multimedia and Communications

Universidad Carlos III de Madrid (Spain)

Sept. 2015 - July 2017

Description: Master specialized in topics such as machine learning, computer vision, and signal processing.

Bachelor's Degree in Telecommunication Technologies Engineering

Universidade de Vigo (Spain)

Sept. 2011 - June 2015

Description: Specialization in Sound and Image Processing.

LIST OF PUBLICATIONS

My research has been published in two journals of different disciplines and in four well-known peer-reviewed signal processing conferences/workshops.

Journal papers:

- Pérez-Vieites, S., & Míguez, J. (2021). *Nested Gaussian filters for recursive Bayesian inference and nonlinear tracking in state space models*. *Signal Processing*, 189, 108295.
- Pérez-Vieites, S., Mariño, I. P., & Míguez, J. (2018). *Probabilistic scheme for joint parameter estimation and state prediction in complex dynamical systems*. *Physical Review E*, 98(6), 063305.

Conference peer-reviewed papers:

- Cox, B., Pérez-Vieites, S., Zilberstein, N., Sevilla, M., Segarra, S. & Elvira, Víctor. *End-to-end learning of Gaussian mixture proposals using differentiable particle filters and neural networks*. **Accepted in ICASSP 2024**.
- Pérez-Vieites, S., & Elvira, V. (2023). *Adaptive Gaussian nested filter for parameter estimation and state tracking in dynamical systems*. In *ICASSP 2023-2023 IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP)* (pp. 1-5). IEEE.
- Pérez-Vieites, S., & Míguez, J. (2020). *A nested hybrid filter for parameter estimation and state tracking in homogeneous multi-scale models*. In *2020 IEEE 23rd International Conference on Information Fusion (FUSION)* (pp. 1-8). IEEE.
- Pérez-Vieites, S., & Míguez, J. (2020). *Kalman-based nested hybrid filters for recursive inference in state-space models*. In *2020 28th European Signal Processing Conference (EUSIPCO)* (pp. 2468- 2472). IEEE.
- Pérez-Vieites, S., Vilà-Vals, J., Bugallo, M. F., Míguez, J., & Closas, P. (2019). *Second Order Subspace Statistics for Adaptive State-Space Partitioning in Multiple Particle Filtering*. In *2019 IEEE 8th International Workshop on Computational Advances in Multi-Sensor Adaptive Processing (CAMSAP)* (pp. 609-613). IEEE.

Pre-prints and submitted papers:

- Pérez-Vieites, S., Molina-Bulla, H., & Míguez, J. (2022). *Nested smoothing algorithms for inference and tracking of heterogeneous multi-scale state-space systems*. arXiv preprint arXiv:2204.07795.

FELLOWSHIPS, GRANTS, PRIZES AND AWARDS

PIPF grant (Personal Pre-doctoral en Formación) for Ph.D. students

Universidad Carlos III de Madrid (Madrid, Spain)

11/09/2017 – 09/04/2019

ORGANISATION ACTIVITIES

Local arrangements committee, SMC 2022

04/05/2022 - 06/05/2022

Description: I have been involved in the organization of the 5th Workshop in Sequential Monte Carlo Methods 2022 (SMC 2022) in Madrid, Spain. To be specific, I led the **local arrangements committee**, producing the programme, arranging the registration materials, and supporting the sessions.

CONFERENCES AND SUMMER SCHOOLS

I have presented all my research advances in eleven international and two national conferences. I have also attended other workshops and summer schools.

- **14th International Conference on Monte Carlo Methods and Applications (MCM 2023)**
Paris (France) 26/06/2023 - 30/06/2023
Attendance and contributed talk
Talk title: *Adaptive Gaussian nested filter for joint parameter and state estimation in state-space models*
- **2023 IEEE International Conference on Acoustics, Speech, and Signal Processing (ICASSP 2023)**
Rhodes Island (Greece) 04/06/2023 - 10/06/2023
Attendance and poster presentation
Paper title: *Adaptive Gaussian nested filter for parameter estimation and state tracking in dynamical systems.*
- **SIAM Conference on Mathematics of Data Science (MDS22)** 26/09/2022 - 30/09/2022
Hybrid conference. San Diego, California (US)
Attendance and poster presentation
- **5th Workshop in Sequential Monte Carlo Methods 2022 (SMC 2022)** 04/05/2022 - 06/05/2022
Universidad Carlos III de Madrid (Spain)
Attendance and poster presentation
Part of the local arrangements committee
- **9th Spanish Workshop on Signal Proc., Communications & Inf. Theory (SIC 2022)** 03/05/2022
Universidad Carlos III de Madrid (Spain)
Attendance and poster presentation
- **28th European Signal Processing Conference (EUSIPCO 2020)** 18/01/2021 - 22/01/2021
Virtual conference
Attendance and poster presentation
Paper title: *Kalman-based nested hybrid filters for recursive inference in state-space models.*
- **23rd Conference on Information Fusion (FUSION 2020)** 06/07/2020 - 09/07/2020
Virtual conference
Attendance and poster presentation
Paper title: *A nested hybrid filter for parameter estimation and state tracking in homogeneous multi-scale models.*
- **27th European Signal Processing Conference (EUSIPCO 2019)** 02/09/2019 - 07/09/2019
Universidade de A Coruña (Spain)
Attendance and 3 minutes thesis talk
- **Workshop on Stochastic Parametrizations & Their Use in Data Assimilation** 01/07/2019 - 05/07/2019
Imperial College London (UK)
Attendance
- **Mathematics of Planet Earth Centre for Doctoral Training Summer School** 24/06/2019 - 28/06/2019
Met Office (Exeter, UK)
Attendance

- **SIAM-IAM student chapter conference** 07/06/2019
University of Reading (UK)
Attendance and poster presentation
- **LMS Invited Lecture Series & CRISM Summer School in Comp. Statistics** 09/06/2018 - 13/06/2018
Warwick University (UK)
Attendance and poster presentation
- **ISBA 2018 World Meeting** 24/06/2018 - 29/06/2018
University of Edinburgh (UK)
Attendance and poster presentation
- **Particle methods and Data assimilation workshop** 08/05/2018 - 10/05/2018
Imperial College London (UK)
Attendance
- **7th Spanish Workshop on Signal Proc., Inf. Theory & Communications** 23/01/2018
Universidad de Navarra (San Sebastián, Spain)
Attendance and poster presentation
- **Sequential Monte Carlo Workshop 2017 (SMC 2017)** 30/08/2017 - 01/09/2017
Uppsala University (Sweden)
Attendance and poster presentation

PROJECTS

I have participated in the following research projects at Universidad Carlos III as part of the scientific team.

- **PRACTICO-CM** Psiquiatría Computacional y Modelos Integrales de Comportamiento
Funding agency: CAM. Consejería de Educación e Investigación (Y2018/TCS-4705)
PI: Antonio Artés Rodríguez. Budget: 645.775,90 €
- **BAYTREE** Advanced Bayesian computation methods for modeling and inference in complex dynamical networks
Funding agency: Office of Naval Research Global (N00014-18-S-B001)
PI: Joaquín Míguez Arenas. Budget: 137.565,10 €
- **Métodos computacionales bayesianos avanzados para estimación, predicción y control en sistemas multisensoriales complejos**
Funding agency: Ministerio de asuntos económicos y transformación digital (TEC2015-69868-C2- 1-R)
PI: Antonio Artés Rodríguez, Joaquín Míguez Arenas. Budget: 314.600,00 €
- **NICOP** - a new sequential Monte Carlo framework for tracking of non-linear complex dynamical systems
Funding agency: Office of Naval Research Global (N62909-15-1-2011)
PI: Joaquín Míguez Arenas. Budget: 162.229,00 €

TEACHING EXPERIENCE

I have taken part in the teaching duties at undergraduate level, teaching (in Spanish and/or English) different courses in telecommunications engineering. I have also obtained good teaching quality indicators.

Courses taught at Universidad Carlos III as **teaching assistant**:

- **Linear systems** (2017-2019)
Degrees: Mobile and Space Communications Engineering (B.Sc.), Telecommunication Technologies Engineering (B.Sc.) and Telematics Engineering (B.Sc.)
Teaching hours: 112 hours

- **Linear networks analysis and synthesis** (2017 – 2018)
Degree: Telecommunication Technologies Engineering (B.Sc.)
Teaching hours: 5 hours

At Universidad Carlos III, detailed polls are anonymously filled by students at the end of each course. All the grades obtained have been averaged over all courses and all academic years yielding: **4.1/5**.

OUTREACH ACTIVITIES

- I have established a collaboration with **MeteoGalicia**, a meteorological agency (equivalent to the MetOffice in Galicia region, Spain), to apply stochastic filtering in **weather forecasting**. I have used the Weather Research and Forecasting (WRF) Model, satellite data, and data collected from meteorological base stations in Galicia.
- **Participation in several challenges** directly related to providing solutions and generating impact in industry/society: (1) Earth Observation challenge (organized by the University of Edinburgh and Saxavord), (2) National Grid ESO Workshop (discussing use cases proposed by the NGESO team), and (3) AIMday Quantum Computing, discussing a use case of Police Scotland.

REVIEWER ACTIVITIES

I have served as a reviewer for several journals and conferences.

- **Journals:** Foundations of Data Science, IEEE Transactions on Signal Processing, and IEEE Signal Processing Letters.
- **Conferences:** EUSIPCO, ICASSP.

MAJOR COLLABORATIONS

I have started several collaborations with other six researchers from different research areas and universities.

- **Inés Pérez Mariño** (Professor at the Universidad Juan Carlos, Spain).
Description: We investigated using Bayesian inference methods in chaotic and nonlinear systems.
- **Jochen Broecker** (Associate Professor at the University of Reading, UK).
Description: Analysis of different stochastic parameterizations and how they affect the behavior of simplified models.
- **Jordi Vilà-Valls** (Associate Professor at ISAE-SUPAERO, University of Toulouse, France), **Pau Closas** (Assistant Professor at Northeastern University, USA), **Mónica F. Bugallo** (Professor at Stony Brook University, USA) and **Petar M. Djurić** (Distinguished Professor at Stony Brook University, USA).
Description: We have investigated the use of Bayesian methods in engineering challenges such as multiple target tracking and estimation of high-dimensional systems.
- **Martin Sevilla**, **Nicolás Zilberstein** (PhD students at Rice University, USA), and **Santiago Segarra** (Assistant Professor at Rice University, USA).
Description: We have investigated the use of deep learning methods to learn proposal distributions in a differentiable particle filter framework.
